

# CUED Library Research Support

An aerial photograph of a university courtyard. In the center is a large, circular, shallow fountain with a modern, abstract sculpture made of green and white geometric shapes. The courtyard floor is paved with light-colored hexagonal tiles, some of which are darker. Numerous people are walking around the courtyard. To the left, there are several bicycles parked in rows. On the right, there is a purple canopy tent and a group of people gathered around it. In the background, there is a brick building and a street with a car.

Dan Crane, Research Support Librarian

# What is

# OPEN ACCESS ?

Making research freely available online so that people can read, download, copy, distribute, print, search, link or use without financial, legal, or technical barriers.

# Why

# OPEN ACCESS ?

**More people see your work**

increased visibility and citation rates

**It's a good thing**

Free access to publicly-funded research

**Your funder and institution are happy**

Funder and research assessment requirements met

# **“Gold” Open Access**

**Your paper is immediately and freely  
available on the publisher’s website  
(often, but not always, on payment of  
an Open Access charge)**

A close-up photograph of green leaves with numerous water droplets on their surfaces. The leaves are vibrant green and have a slightly serrated edge. The water droplets are clear and vary in size, some hanging from the edges of the leaves. The background is a soft, out-of-focus green, suggesting a natural, outdoor setting.

# **“Green” Open Access**

Making your paper available in an institutional website, repository or archive, sometimes after an embargo period

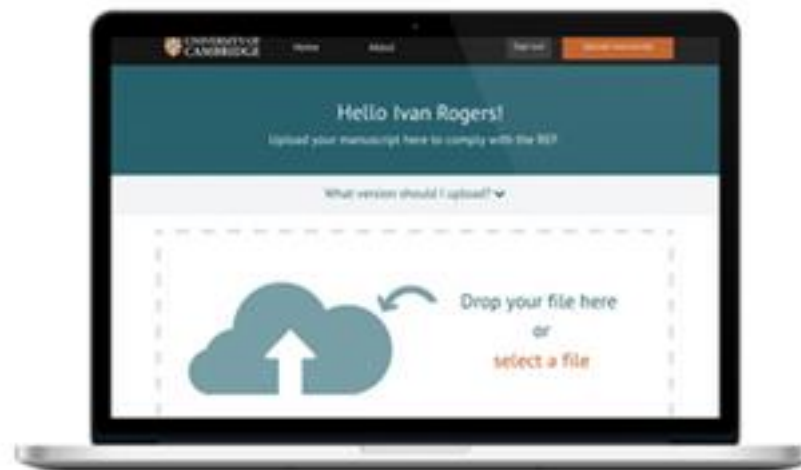

# University Policy

“The University of Cambridge is committed to the dissemination of its research as widely as possible, and supports the principle that the research that has been publicly funded should be freely accessible by the public.”

# Accepted for publication?

Upload your manuscript,  
to meet REF and funders' Open Access requirements

Welcome to the University of Cambridge Research Data Management Website

## Welcome to the University of Cambridge Research Data Management website

There is an increased emphasis on managing and sharing data produced in research. Many of the research funders supporting work at the University of Cambridge require that research data are openly available with as few restrictions as possible. This website will guide researchers through various aspects of research data planning and management and will provide assistance in meeting funders' expectations.

*Acknowledgement: We are thankful to the [Cambridge University Library](#) for allowing us to re-use parts of research data management pages when creating this website.*

## Frequently Asked Questions

Thanks to all the people who have attended our open data sessions during the first half of 2015. We were able to collect all the questions we received from researchers and research students and have prepared a list of Frequently Asked Questions.

We would also like to thank **Ben Ryan from the EPSRC** for carefully checking our advice and for his comments that helped us improve the answers.

We have arranged the list of FAQ into eight categories, thematically grouped:

[What needs to be shared and when?](#)

[Questions about exemptions from research data sharing](#)

[Questions about resources to support research data sharing](#)

[Questions about data repositories](#)

[Questions about personal/sensitive/commercial data](#)

[Questions about source code sharing](#)

## DSpace@Cambridge

DSpace@Cambridge is the University of Cambridge's institutional repository, preserving and providing access to content created by members of the University. It is delivered and managed by the University Library.

Have you had a research article accepted for publication? Upload your accepted manuscripts to the [Open Access website](#) to meet REF and funder Open Access requirements. Publications will normally be added to DSpace and be made public as permitted.

If you believe that any material held in DSpace@Cambridge infringes copyright please follow the guidance in our ['Notice and Take Down' policy](#) and we will remove the work from the repository and investigate your claim.

### FAQ

## University of Cambridge Research Data Management Policy Framework

*Last updated: 23 April 2015*

### Background

1. The University of Cambridge is committed to disseminating its research and scholarship as widely as possible. In keeping with that commitment, it supports the principle that the results of its research that have been publicly funded should be freely accessible, and therefore supports its staff in making their research available.
2. University staff and students are responsible for managing and curating data in accordance with Chapter XIII of the [University's Statutes and Ordinances on Finance and Property](#), subsection [Intellectual Property Rights](#)<sup>1</sup>, the [University's Research Policies](#)<sup>2</sup>, the [University's Research Integrity and Ethics guidelines](#)<sup>3</sup> and in accordance with the [policies of their research funders](#)<sup>4</sup>.

### Principles

3. In seeking to extend the principle of disseminating research and scholarship as widely as possible from research publications to all forms of research data (defined as materials to validate published research findings), the University is committed to implementing procedures that are discipline-appropriate, proportionate, evidence-based, practical, cost-effective and sustainable, and in the best interests of enhancing its mission.
4. The University is committed to achieving compliance with the data policies of its

### FAQ

## Various forms of research data

Research data management is a complex issue, but done correctly from the start, could save you a lot of time and hassle at the end of the project - when preparing your data for a publication or writing up your thesis. Research data takes many forms, ranging from measurements, numbers and images to documents and publications. The resources on these pages were prepared for you by the [University Library](#) to help you plan, create, organise, share, and look after your research materials, whatever form they take.

**"Come fly with me" - improve research impact with Twitter** [PREREQUISITES](#) [NEW](#) [SPECIAL](#)**Fri 25 Sep 2015** - The Postdoc Centre, Eastwood Room

P

Bookings cannot be made on this event (Event is not taking bookings)

 **Dates available:** **Fri 25 Sep 2015 09:30**

**Description:** This day-long training course consists of a mixture of taught and interactive practical elements intended to show participants how to get the best out of Twitter for research purposes.

**Please note that this course requires you to have an existing working knowledge of Twitter. In order to apply you must fill in an application form available at the following address**

<https://cambridge.onlinesurveys.ac.uk/come-fly-with-me-application>

**Target audience:** PhD and Post-docs and other research staff

**Duration:** 1 day workshop - Lunch Included

**Sessions:**

Number of sessions: 1

Date	Time	Venue	Trainer
Fri 25 Sep	09:30 - 16:30	The Postdoc Centre, Eastwood Room	

**Format:** Interactive Training Sessions

**Frequency:** Pilot Course - Once Only!

**Prerequisites:** Basic knowledge and use of Twitter – no complete newbies please!

**You must apply using the application form - see course description**

**Aims:** Encouraging participants to consider how to craft better tweets, develop their reach, make them more effective users of the platform's features and grow their audience

# Training

- University-wide, particularly on Open Access and Open Data
- Department Library in groups or one-to-one
